Subject: add'l BBA mine team issues

Hi all,

Jeff, Glenn and I had another discussion this morning about comments from the peer review panel, and things we need to try to address (at least at some level) in the final draft of the assessment. Stemming from that discussion was, in part, a list of additional issues for the mining team to consider (see below). These are not necessarily all issues that we need to include in the final assessment, given our current scope and deadline - but they are issues that have been raised by the review process, that we at least should give some thought to.

Please have a read through the list and let us know your thoughts (e.g., Given our current deadline, what's feasible on these issues? Given some additional time, what would be feasible?). As you can see, most of these have not been tasked to anyone yet - so if there's an issue you would like to (or can be persuaded to) take on, please speak up.

As always, just let me know if you have any questions.

Thanks, Kate
